Master's in Data Science student with strong skills in SQL, Python, Power BI, and data analytics. Experienced in developing dashboards, performing data analysis, and building business-oriented projects. Interested in Data Analytics, Business Intelligence, and Analytics Consulting roles

KEY PROJECTS

Smart Retail Market Basket Analytics & Product Recommendation System

- Developed an end-to-end retail analytics application that analyzes customer purchasing patterns using Market Basket Analysis.
- Cleaned, preprocessed, and transaction-encoded retail datasets to prepare data for association rule mining.
- Implemented Apriori and FP-Growth algorithms to discover frequent itemsets and generate association rules.
- Built a Product Recommendation Engine using Support, Confidence, and Lift metrics to recommend related products.
- Developed RESTful APIs using FastAPI for recommendation services.
- Designed an interactive Streamlit dashboard to visualize frequent itemsets, association rules, and product recommendations.
- Compared the performance of Apriori and FP-Growth algorithms for retail transaction analysis.
- Used Git & GitHub for version control and project collaboration.
- Technologies: Python • Pandas • NumPy • Mlxtend • Apriori • FP-Growth • FastAPI • Streamlit • Uvicorn • Git • GitHub

Loan Approval Prediction System

- Developed a machine learning model to predict loan approval based on applicant attributes, including income, education, credit history, loan amount, marital status, and property area.
- Performed data cleaning, preprocessing, feature engineering, and exploratory data analysis (EDA) to prepare the dataset for model training.
- Trained and evaluated classification models using Scikit-learn to improve prediction accuracy and assess model performance.
- Visualized data distributions and feature relationships using Matplotlib and Seaborn to derive meaningful insights.
- Built and deployed an interactive Streamlit web application for real-time loan approval prediction.
- Applied the complete machine learning workflow, from data preprocessing and model development to deployment and user interaction.
- Managed project version control using Git and GitHub.
- Technologies: Python • Pandas • NumPy • Scikit-learn • Matplotlib • Seaborn • Streamlit • Git • GitHub

INTERNSHIP

- AI/ML Intern Trainee - CONTUS TECH PRIVATE LIMITED (May 2026 – June 2026)

TECHNICAL SKILLS

- Python
- Data Analytics
- Power BI
- FastAPI
- SQL
- Excel

SOFT SKILLS

- Problem Solving
- Analytical Thinking
- Team Collaboration

EDUCATION

Master's in Data Science
Dwaraka Doss Goverdhan Doss Vaishnav College
CGPA: 8.9
2025-2027

Bachelor of Science in Data Science
Valliammal College For Women
CGPA: 8.5
2022-2025

CERTIFICATIONS

- Generative AI Engineering : Foundation RAG & Deployment - HCL GUVI (2026)
- Workshop: Power BI (AI-Powered Dashboards) – Office Master (2026)
- Workshop: AI Tools and ChatGPT – be10x (2026)
- Certification: Python for Data Science – NPTEL (2024)
- Certification: Data Science Foundation – Great Learning (2024)
